PROFILE

I'm a PHP/Symfony web developer with 5+ years of experience building B2B web applications, integrating ERP/CRM, Magento 2, APIs and internal business tools. Currently I'm working on the integration of agent-based features inside Symfony applications, by creating agents for real customer applications with logs, debug and custom precision logic. Also, still "standard" customer requests and features.

TECHNICAL SKILLS

Backend	PHP, Symfony, Doctrine ORM, MySQL, REST APIs
Frontend	JavaScript, jQuery, Twig, Bootstrap, DataTables
Integrations	Magento 2, ERP/CRM systems, third-party APIs, custom business platforms
Tools	Git, Docker, PhpStorm, Postman, SSH
AI / LLM	OpenAI/Anthropic APIs, NeuronAI, LLM provider integrations, agent workflows, AI usage and cost tracking

WORK EXPERIENCE

03/2021 - Present

Web Developer

S.E.C. System Engineering Consulting S.r.l.

- Develop and maintain B2B web applications using PHP, Symfony, Doctrine, Twig, JavaScript, jQuery and Bootstrap.
- Build ERP/CRM modules for orders, customers, documents, reporting, surveys and internal business workflows.
- Integrate third-party systems through REST APIs, including ERP, CRM, Magento 2 and custom business platforms.
- Work on AI integrations inside Symfony applications, including LLM provider configuration, API calls, agent workflows and usage/cost tracking.
- Maintain backend logic, database queries, frontend interfaces and debugging workflows across legacy and modern Symfony projects.

06/2019 - 06/2020

Web Designer

Publiem srl

- Designed and maintained websites and frontend layouts using HTML, CSS, JavaScript and Bootstrap.
- Combined design background with practical implementation work for small business web projects.

PROJECTS

- **OCR feature made with the OpenAI ChatGPT API:** given an uploaded electric/gas bill, the program could extract all the given data from the document, allowing Symfony to create new contracts based on that data.
- **Integration of the NeuronAI framework into a Symfony 5 web app,** with AI Provider selection, cost caps setups and logging tables.
- **Magento 2 Integration:** Worked on synchronization between Symfony 3/5 web application and Magento 2.
- **Personal Website:** Built a personal website while studying Python and Django: albertonessi.it.

EDUCATION AND TRAINING

- **2020 IFTS Course "Full Stack Developer for Industry 4.0"** - Fondazione Et Labora
- **2020 Online course: "Diventare web designer da zero"** – Udemy
- **2020 Online course: "Diventa uno sviluppatore front-end con JavaScript e jQuery"** – Udemy
- **2019 Bachelor's Degree in Industrial Product Design** - Politecnico di Milano
- **2014 Art Diploma** - Liceo Artistico Statale Giacomo e Pio Manzù, Bergamo
